

Grimsby Garden Club

Garden of the Month for June 2017

If you are driving along Lake Road, be sure and turn down Morrison Crescent to number 78 to enjoy the lovely June garden of Mr. and Mrs. Andrew McQuillan. Small, but mighty, their garden has much to please the eye from the hens and chicks in the rock garden, the gorgeous clematis, the boxwood topiary, and the stately larch, to the interesting cacti surrounded by bursts of colour from the variety of flowering perennials. Cotoneaster spreads over one area while lavender, Russian sage, sedum, Scotch thistle and sea holly cover another. Blue spiderwort, columbine, copper yarrow, bachelor's buttons and rock asters abound, along with many beautiful hostas. The porch and house are brightened by colourful baskets of pink geraniums. Please be sure to see this very special and interesting spring Garden of the Month for June.

Winning gardens are chosen based on our criteria for curb appeal, colour design, and maintenance. Please visit our website at www.grimsbygardenclub.ca.
