to me

Hello Rose:

What a fine name for student of horticulture! My wife has a middle name Rosalie which is also wonderful for a husband who has spent his academic life working on roses. I have filled out your form; however, I have no knowledge of the Districts. My presentations would be on the topic of wild and garden roses. I have studied all aspects of the biology of wild roses across Canada since my MSc days in Edmonton in 1968. Best wishes.

Joe

Member of the Steering Committee for the Great Lakes Islands Alliance.

Since its discovery in the mid-1800's, photography has made an invaluable contribution to the telling of stories. Photographs raise awareness of the natural beauty on Manitoulin Island and on the hills of Sudbury and contribute to making the world a better place. *"Taking pictures is savoring life intensely, every hundredth of a second* (French photographer Marc Riboud).

Banquet presentations include 'On the hills of Sudbury', Natural history of Manitoulin Island', 'For the love of a rose', 'Lowbush blueberry: Canada's smartest plant' and 'Amazing insects: Little things that run the world'.

For information on photographs of Sudbury ecosystems or Manitoulin Island contact me at: _roses@cyberbeach.net

"One may live without bread, but not without roses"

Jean Richepin (1849-1926, French writer)
